REZA BABAPIRI / ENGINEERING PORTFOLIO

ENGINEERING PROJECTS

Mechanical Design · Embedded Robotics · Control · Automotive · AI

Explore the complete portfolio online

reza-babapiri.github.io

Five connected disciplines

Mechanical Design & Manufacturing

CAD, industrial equipment and digital manufacturing

2 published case studies · PDF available

Embedded Systems & Robotics

Sensing, microcontrollers, actuation and functional prototypes

1 published case studies · PDF available

Control Systems & Automation

Feedback control, power electronics and estimation

4 published case studies · PDF available

Automotive & Vehicle Simulation

Vehicle models, dynamic systems and co-simulation

5 published case studies · PDF available

Computer Vision & AI

Image processing and semantic segmentation

1 published case studies · PDF available

Portfolio projects include academic simulations and professional practice descriptions.
Methods and limitations are disclosed on the individual case-study pages.
